LEGAL DEPOSIT/DRC N°: FT 3.02006-57158

From the same author in the collection "The Verses of the Scholars".

Volume I: Cosmology according to biblical and ancient models (French version : ed. Exibook)

First part: Introduction to Pre-Big-bang (éd. Librinova)

Volume II: The field of the Universal Cosmological Model (French and English version : ed.Librinova)

Volume III: Pre-Big bang – Big bang– after Big bang (French and English version : ed.Librinova)

Volume IV: The enigmas of Universe solved in the Universal Cosmological Model (French version : ed. Librinova)

Volume I: Noah to Barack Obama (French and English version : ed.Librinova)

From the same author in the collection "Astronomy&Theology".

Volume III : Big-bang to humankind (ed. Librinova)

Cover: The shadow of True Parent crisscrossing the cosmos.

Contents

Preface

Foreword

General introduction

Chapter I: The field of the Universal Cosmological Model

Chapter II: The Pre-Big Bang

Chapter III: The Big-bang

Chapter IV: The After Big-bang

Chapter V: The creation, evolution and progression of Universe

Chapter VI: Galaxies and planets in the Solar system

Chapter VII: The Sun or the Universe in miniature

Chapter VIII: The physics of creation

Chapter IX: Classical thoughts

Chapter X: The Universal Cosmological Model versus classic Models

Chapter XI: Science and Religion

General conclusion

Bibliography

Epigraph

The eight billion human beings are in fact the eight billion solutions to the problems we face. This is why the development of human beings in every corner of the planet shall be promoted.

Flavien PHANZU MWAKA

Dedication

We dedicate this book to our parents Joseph MPANZU MAKWALA BABAKA and Philomene KIADI UMBA, To my tender wife Djenny MANENE and to our beloved child Nera LEMA PHANZU.

May they find through these dedications, the expression of our love for them.

Preface

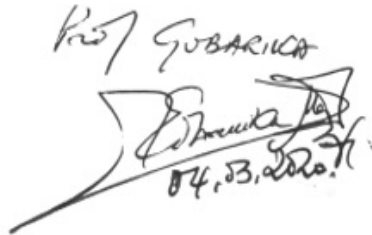

Good research work with through undeniable religious, scientific and cultural depth dimension. The covered field topic covered is tough and defensible in the light of reliable material evidence.

This text should be published as an essay balloon for readers unfamiliar with cosmological combined with biblical evidence.

I would like the publication to be partial (3 or 4 volumes) in successive editions and not all at once because of the rigidity of the addressed matter topic addressed.

Once again, thank you and good luck !

Foreword

We have divided our books into volumes for the following reasons:

– Volume I constitutes the scientific restitution of the biblical and the ancient creation story. It is the foundation of the Universal Cosmological Model. As the word "Bible" is sacred, I did not want it to be tarnished by criticism of my work or my ideas. So I have detached everything that can be discussed, that is to say everything that can be judged or criticized, I have put it here in this Volume.

– Thus, a judgment such as "I do not agree with the Universal Cosmological Model" is better than hearing someone say "I do not agree with cosmology according to the "Biblical Model". It is to spare the word "Bible" from such criticism that we have detached in the ideas that are part of our contribution to science and put it in this Volume.

– In addition, this Volume is part of my personal enrichment on the study of the universe as the creator of a model. Thus, it proves the place of the Universal Cosmological Model compared to other models. This is to put an end to all those who have labelled us as concordists.

The Universal Cosmological Model field deals with cosmology, not religion. Cosmology is the science that studies the origin and evolution of the universe. We are concentrating for the moment on restoring the first cosmological text discovered on papyrus written by a Jewish scholar in the name of Moses. In order to do this, one must have the knowledge of cosmology and the Principle of Creation of Dr. Sun Myung Moon. These two main disciplines form Astrotheology.

I analyze biblical verses in the same way as I do books and scientific quotations. As an archaeologist of biblical verses, I take what was considered spiritual, I bring it back to earth for scientific analysis.

We should know that that we are not be the last generations of the Universe and our current judgments cannot be taken as absolute. Thirty-five centuries ago, nobody knew that the biblical scheme of creation would pass from religion and

cosmogony to science. Today it is analyzed in cosmology through its scientific restitution in the Universal Cosmological Model.

In spite of my research and knowledge, I have not reached a full understanding of this scientific restitution and I am not yet able to express it perfectly. This consideration concerns especially the pre-Big-bang, because the Post-Big-bang is widely analyzed by science even though it made a bad start by making the Big-bang the point of origin of the Universe therefore excluding the biblical scheme of creation.

What I present in the books of the series "The Verses of the Scientists", are only introductions to open the door to the masters of this discipline who are astrophysicists, cosmologists, astronomers, planetologists, physicists, astrochemists, theologians and all those who devote themselves to the study of the origin of creation, in order to allow them to study and develop it in a scientific way for some and in a theological way for others.

However, no one will really be able to discover the keys to the Universe in a perfect way. Even though we have within us the spirit of the Christ the one who witnessed these things (Jn 1:2), we are only the result. Besides, in science it is said that an answer brings up other questions. As long as we have not yet reached the Cause, we will always have questions.

When God told me that all models should be based on the biblical scheme of creation, even if no one can believe me as the relationship with God is personal from one individual to another, I shuddered at the thought of writing it in my book, because at that time I didn't know how to defend it. But the real defense will only come from the scientists themselves, who were only waiting for the biblical scheme of creation to be clarified, even though the terms are sometimes unsuitable for science. The real terms for science are the results of research. Therefore, scientifically the Universal Cosmological Model is the result of the research I do, since I bear full responsibility for it. But we cannot dismiss God as the hero in the shadows.

The knowledge of the teachings of the Divine Principle of Rev. Dr. Sun Myung Moon and the preliminary notions in cosmologies, allowed me not only to clarify the biblical scheme of creation but also the Ancient Models and exploited by the various sects, including esoteric sects. It also allowed me to offer a clear explanation of the creation of man according to the Koran and to
